Sus-LaB3 New Event - Short Oral Report (SOR)

Dear colleague:

On behalf of Technical Program Committee, I thank you for your continuing support for the Sus-LaB3 2019 event. Now we have already **closed** the final call for LATE NEWS announcements. Up to now we received more than **75** regular technical abstracts and **13** late-news report with **10** nationalities. Please visit website to have a look on the accepted paper list. Formal acceptance letter, along with the update info, and the payment guideline will be mailed to all the authors before January 25.

As mentioned earlier, we would like to arrange the Sus-LaB3 2019 as a new type of academic activity. In Sus-LaB3, SHARING the IDEAS is extremely important. Now we offer a very good opportunity for those who might not familiar with the regular academic report, but still like to share their knowledge to *Sustainable Life and Business*. Now, we design a novel sharing activity - Short Oral Report (SOR) - a **3 minute** oral presentation with just 2 slides can help people to understand the most substantive part of your latest concept. The first slide describes the **PROBLEM** that you foresee or encounter, and a second slide provides the **SOLUTION** of this problem. Easy enough, isn't it? Commercialized products, prototypes from the labs, a concept inspired in the classroom, even an instant idea, are all welcome to join the SOR presentation.

There are only two restrictions for SOR – it must run across the scope of the Sus-LaB3 and the proposed **PROBLEM-SOLUTION** scheme is logically viable. **The registration fee is 100 USD.** We appreciate your stopping by and willing to book the Sus-LaB3 2019 in your calendars. Please support and spread the information to your colleagues, tell them do not hesitate to join the Sus-LaB3 2019 event. We are looking forward to have all of you, as our honorable guest, in Hsiuping University, Taiwan.

Sincerely,

Sus-LaB3 2019 Technical Program Chair

San Lin Young
